# IoT Smart Wifi Device

*“One Device - Multiple Application”*

Our IoT Smart WiFi Device is designed to automate your everyday needs. With inbuilt RTC, Temperature & Humidity Sensors, and Android App Support, you can monitor and control devices any me, anywhere.

## Auto & Manual Mode

Set timers or control directly from the app.

## Multi-Relay Control

Manage multiple devices at once.

## Real-Time Clock

Accurate time-based automation.

## Sensors Built-In

Monitor environment in real-time.

## Cloud & App Access

Control remotely from your smartphone.

 **Smart Irrigation**  
Automate pumps, ensure crops get water at the right me

 **Greenhouse**  
Maintain humidity & temperature for be er yield.

 **Mist Cooling**  
Autostartmist/foggers based on temperature.

 **Farm House**  
Manage fmist cooling for animal comfort
